

Packaging & Shipping Division 6.2 Materials

This free training course is designed to be approximately 4 hours, and delivered in an in-person format to offer hands-on, in-depth training including a question and answer session. The training will instruct shippers of infectious substances in compliance with current US Department of Transportation (USDOT) and International Air Transport Association (IATA) regulations so that they are able to be certified at their workplace to package and ship Category A infectious substances.

Objectives:

At the conclusion of the training, participants will be able to:

- Understand and comply with applicable regulations
- Identify and classify types of Division 6.2 Infectious Substances including Exemptions, Category B, and Category A
- Identify basic triple packaging procedures for all classifications
- Identify the proper labels and markings required for Division 6.2 and Dry Ice
- Comply with the training necessary for certification at their workplace to package and ship Category A infectious substances

Target Audience:

This training is primarily intended and designed for laboratory professionals or shippers working in clinical settings who will be classifying, packaging and shipping, or will be responsible for shipment of infectious substances. Division 6.2 Infectious Substances are regulated as Hazardous Material and the training requirements are applicable for those who:

- Load, unload, or handle dangerous goods
- Mark, label or otherwise prepare containers or packaging for transportation of dangerous goods
- Prepare a Shipper's Declaration of Dangerous Goods form or is responsible for documentation

Dates, Times, and Locations:

All classes begin at 1:00 pm; check in begins at 12:30 pm, and class will be dismissed at 5:00 pm
